COMPLETE SET OF THE 1915 PAN PACIFIC COINS IN ORIGINAL COPPER FRAME

915 **1915 Pan Pacific Set, consisting of two fifty dollar gold pieces, octagonal and round. $2.50 and $1.00 in gold, and the half dollar in silver. In the original copper frame as issued at the exposition.**

On the basis of the past records of these rare sets this has always proven to be high on the list of blue chip investments. The original cost was 250.00 in 1915 and the last sale of a choice set in frame was at the ANA convention last August in Boston where a dealer paid 6500.00 for the set.

Only 483 sets were sold at the exposition and if an exact count were to be taken of the complete sets in existence we doubt if the figure would reach fifty.

The commemorative $50 gold pieces are truly beautiful coins and this complete set is just as nice as any we've ever offered. A new record could be established on this set. Worth (7000.00)

916 **$50 Pan Pacific Round. Very scarce and seldom offered. There were 483 struck and this brilliant uncirculated specimen is just about as nice now as when it was struck. Should realize (3500.00)**

U. S. $4.00 GOLD — STELLAS

THE HISTORY OF THE "STELLA" OR U. S. $4.00 GOLD PIECES

For the purpose of stimulating foreign trade several attempts have been made from time to time to modify our currency. The Trade Dollar used from 1873 to 1883 to help recover some of the business we lost in China was one attempt. However, in 1867 at a Currency Convention held in Paris the French mint struck a gold coin which had the two values "5 Dollars–25 Francs."

In a spirit of co-operation, the Director of the U. S. Mint ordered the issue of a pattern to correspond to this French coin, and A. C. Paquet designed the U. S. equivalent coin, bearing the head of Liberty on the obverse and "5 Dollar–25 Francs" on the reverse.

Congress did not approve the proposed International coin.

The next attempt to introduce an international coinage was based on a desire to increase the convenience of foreign travel. Dana Bickford, in 1874, persuaded the Director of the mint to design a $10 pattern coin on which was to be inscribed in the center of the coin the weight and fineness in gold, namely "16.72 grams, 900 Fine TEN DOL." The reverse also showed six sections on which was given the value of this coin in terms of currency of six countries (See Adams–Woodin 1370).

Again the Congress did not adopt this coin.

Finally in 1879 the Stella—a $4 gold piece—was designed.

The Secretary of the Treasury devised the unit Four dollars (or 400 cents) which was close to the value of the French 20 Francs, the Italian 20 Lire, the Spanish 20 Pesetas, the Dutch 8 Florins, the Austrian 8 Florins, and fairly close to the British pound.

The $4.00 gold piece weighed exactly 7 grams and contained 6 grams gold, 0.3 grams silver, and 0.7 grams copper.

The name "Stella" was chosen for the coin because the star and the eagle are the national emblems on our coins. The word Stella was inscribed on the body of the star.

Charles E. Barber designed the coin in two styles, one with flowing hair, and the other with coiled hair.

THE EXCESSIVELY RARE HALF EAGLE OF 1828

1171 1828 Perfect Date Variety. Brilliant Semi-Proof, Sharp with raised borders and just about equal to a Perfect Brilliant Proof. While the limelight has been directed on the Great Rarity of the 1815, 1819 and 1822 Half Eagles, and justly so, the excessive rarity of the 1828 Half Eagle, and a few of the other extremely rare dates in the Half Eagles of the 1820's, has been overlooked.
The record of the 1828 Half Eagle is just as impressive and proves it to be just as rare as the 1819 and almost as rare and valuable as the 1815.
In 1906 the H. Smith Sale had both varieties. A year later another overdate was sold in the Stickney Sale.
Not until 1922, in the Ten Eyck Collection, when an extremely fine specimen was sold, had any been sold. From 1922 down to the present time, there have been few of this date changing hands. No new specimens have come to light. It is our opinion that just as few, if not fewer, 1828 Half Eagles have been offered than were offered of the 1815 and of the 1819. (We recently sold an 1819 Half Eagle and know of one other changing hands last year.) Of the 6 or 7 known, this ranks with the best. Difficult to estimate the value but should sell for well over (5000.00)

THE VERY SCARCE 1861 PAQUET TWENTY

1359 **1861-S A. C. Paquet reverse (tall letters) the rarest San Francisco mint $20 gold coin and one of the scarcest of the entire U. S. Gold Series. Only 2 pieces are known from the Philadelphia Mint. The order to cease using the die was given when the Director of the Philadelphia Mint noted that the reverse die was too wide and the borders too narrow. The dies were already being used by the San Francisco Mint before word reached him not to strike any coins with the paquet reverse. 76 years after they were struck the first "s" mint specimen was discovered and was sold to a distinguished collector for 5000.00. The condition was "Very Fine". In the past 23 years a few more have been discovered. The coin offered here is one of the nicest known and slightly sharper than the specimen which sold in our sale last year at 3500.00. This coin is strictly very fine. Few light scratches and bag marks and in checking over the auction records over the years this certainly is one of the nicest known. THE EXCEEDINGLY RARE AND BEAUTIFUL EXTRA HIGH RELIEF
1907 ST. GAUDENS TWENTY DOLLAR GOLD PIECE

1417 MCMVII (1907) The first variety of the new type double eagle by the world famous sculptor Augustus Saint Gaudens. This first type, struck in extra high relief, quite a bit thicker than the regular issue. The relief is much higher and the design so concave that the word LIBERTY and the stars on obverse and the legend on reverse are partly at an angle. Extremely high wire edge. A magnificent gem and the true treasure of this auction. Words and pictures cannot do justice to this beautiful coin.

For years it had been thought that 16 specimens were struck, however, the owner of this coin had the original envelope the coin was presented in and it stated "ONE OF THE 13 STRUCK."

The background leading up to the famous coin is interesting. In 1905 Saint Gaudens discussed with President Roosevelt the beauty of the high relief coins of Ancient Greece and President Roosevelt requested that Saint Gaudens prepare designs for the New Gold Coins.
The great sculptor produced a design recognized as the most beautiful this country has ever produced.

This specimen is the third to be offered at auction and considering the rarity and increased value it is destined, of course, to set a new record. It certainly will be a most gratifying possession to the fortunate buyer of this gem. Worth (25,000.00)

1418 MCVII (1907) This is the variety of which 12,000 specimens were minted. Broad border with wire edge. The extra high relief does not have this border. Roman numeral date, high relief. Brilliant Uncirculated. Rare (425.00)

The set consists of the 8 Gold Dollars, 18 Quarter Eagles, and 23 Half Eagles. The condition of these coins are from Very Fine to Uncirculated. THE LICHTENFELS FRACTIONAL CURRENCY COLLECTION

It is with great pride that we present the following, which for many years was the highlight of Mr. Lichtenfels' collection. As most of the old time dealers recall, this fine gentlemen bid at all the sales and over a period of years put together this outstanding group. There have been only a few sales in the past years that contained nice Fractional Currency and this collection ranks with the best.

The notes are listed according to Robert Friedberg's "Paper Money of the United States" and further research on this series may be obtained by careful study of earlier works by Valentine, Dr. Limpert, and Wayte Raymond.

Fractional Currency has steadily risen in popularity over the years and now on the threshold of the 100th anniversary of the war between the states these notes will be even more in demand and we suggest bids close to our estimates.

GOLD COIN PRICES

Prices between September and December 1960 have risen to unheard of heights in Europe. The Glendining, Adolph Hess, J. Schulman and other sales have surpassed Friedberg's prices in many occasions. Only those gold coins **unlisted in Friedberg** are still selling for low prices and far below their values. In many instances a coin not in Friedberg is either a rarity or a trial or pattern issue – in all cases a real rarity – and good investment. This auction has many **Unlisted in Friedberg** items. In your own interest – BUY THE COINS NOT LISTED IN FRIEDBERG TODAY. They will be worth much more tomorrow.

Please Note: (Some will be included in a new Friedberg edition at much higher values than priced today).

RARE THAILAND GOLD COINS

This beautiful 100 tical (Siamese) gold coin was minted by the Thai Government when the possibility of invasion seemed imminent. This was done to salvage the dwindling gold resources. After the "crisis' was over, most of these coins were remelted by the Government and very few still exist. This very rare gold coin weighs over 5½ ozs. Should bring record price.
